

# IOSH Working Safely

## INSTRUCTOR LED

IOSH Working Safely is designed to inform people at any level within an organisation of the importance of occupational health and safety. Especially suitable for new starts, this course will provide an essential introduction to the basics of safety in the workplace, from identifying potential hazards and risks to taking practical steps to control them wherever possible.

Because this course focuses on best practice rather than legislation, it's suitable for candidates in the global market, and is not just limited to those within the UK. The course contains practical, real-world examples and case studies that delegates are then able to relate to their own working environments.

A host of interactive study modules, PDF texts, exam simulations, practice questions, knowledge checks and videos are also utilised during training.

- Internationally recognised HSE qualification
- Active staff involvement to improve safety in the workplace
- Improved company-wide safety awareness culture and appreciation for safety measures
- Consistent HSE messaging across the workforce

# IOSH Working Safely

The IOSH Working Safely course includes the assessment and the issue of an IOSH certificate following the successful passing of the assessment.

The assessment consists of a 10 question, multiple-choice paper, which delegates will be given 20 minutes to complete, along with a hazard spotting exercise.

Upon completion of the course, the learner will have knowledge of hazards, their associated risks and the controls that can be used to reduce these risks.

#### **Course Duration**

One day

#### **Elements**

Memorable and thought-provoking facts and case studies help reinforce learning throughout the course. Each module is backed by scenarios from genuine work situations. The course includes interactive elements assisting delegates to learn in a refreshing and informal manner.

Five interactive modules:

1. Introducing working safely
2. Defining hazard and risk
3. Identifying common hazards
4. Improving safety performance
5. Protecting our environment

Course certified by IOSH.  
The Institution of Occupational Safety and Health (IOSH) is the only Chartered body for health and safety professionals in the world.
